INTRODUCTION TO PARADOX

2. Paradox Token was created in response to an increasing demand for digital entertainment along the lines of comic, video game, and TV entertainment. All three have been combined into Paradox. Paradox's soul goal was to create a token that would target several markets and create a unique buzz within the crypto world. The name Paradox was chosen due to the Paradox phenomenon within physics which is an apparent contradiction to a physical description of the universe. Which is how we came up with our characters personalities and traits, Dr. Z and his sidekick Gudboi who by pure expression alone would seem to be not of this world.

Our main goal is to create a series of entertainment starting with a comic series and ending with a TV and video game series. Paradox feels that this idea is unique and one of a kind, to which it will fill the demands of a particular community and in a way satisfying the needs of many consumers. We don't only want to be another project; we want to become something uniquely profound and a giant amongst our peers, a legacy to be remembered!

MEET THE TEAM!

3.

The Core Team will also be involved in marketing, analytics, and producing direction and guidance for the project.

DR. Z and GUDBOI

4. Dr. Z is quite the unique character! He was born an orphan and adopted by parents that felt pity for the kid. Growing up Dr. Z was always fascinated with science, but his bizarre looks and freakish personality made him an outcast amongst his peers, which in effect caused him to be bullied often. One day Dr. Z stumbles on an abandoned puppy in an alleyway, fueled by his own past abandonment he decided to take the pup under his wing and give him a home. During his youth his deep desire for acceptance and genuine love caused him to go mad and lose his mind seeking revenge for the unfair treatment he endured. His newfound life mission is to mold the unfit world into his own desired image and creation by genetically mutating the world population into people just like him. He vows to never stop until he succeeds, and poor Gudboi becomes his first failed experiment. Or was he???

GUDBOI

3. Oh Gudboi!!! Poor Gudboi!!! Gudboi became Dr. Z trusted sidekick and only friend, tragically what was once a simple dog became a sort of.... Special dog! But he's not just special in the sense of being slow, NO!! Gudboi is secretly a hero who stops all of Dr. Z's experiments when Dr. Z least expects it. Gudboi is indeed a good boy! Saving the world one experiment at a time, Gudboi isn't just a goofy dog, no, behind his squirrely eyes and panting tongue is a dog with a secret... SUPER GENIUS INTELLIGENCE!!! But, in order for Gudboi to save the world, Dr. Z must NEVER know!

ANTI-BOT AND TAXATION

Integrated within our contract we programmed an anti-bot algorithm which will automatically deny and honeypot any bots trying to snipe our contract. We believe that bots are a huge plague to the initial launching of a new token, which is why we have taken all precautions to eliminate that issue. We don't wish for our investors to have to fight for a better position within our token, it is not fair to the real-life investors who believe in this project.

TAXATION

In addition to the Anti-bot programming we have decided to add heavy taxes to the initial launching days of the token to prevent unnecessary dumping. Paradox believes in this community and project, the last thing we want is people who are here to make a quick buck. We have also limited the max buy for the initial launch dates to prevent whales from accumulating and then dumping. Taxation will be done as follows...

- **33% Days 1-2**
- **23% Days 3-4**
- **13% Days 4-infinity**
 - **Max wallet allowance 1%**
 - **Max buy on launch 1%**
